

SECURITY AUDIT NEGATIVE TEST SUITE

TAMPERED TEST SPECIMEN -- INTENTIONAL COMPLIANCE VIOLATION

Designed to verify automatic detection of byte modifications, mismatched PANs & broken DSC hashes

SIMULATED ADVERSARIAL ANOMALIES INJECTED:

1. Injected Shell Company Identity

Original signer company replaced with "Shell Enterprise Fake Ltd" post-signing.

2. Cryptographic Digest Mismatch

Signed byte stream SHA-256 does not match PKCS#7 envelope signature.

3. Invalid PAN Checksum

PAN string altered to "XX99999999", failing official CBDT MOD-11 validation algorithm.

4. Revoked CA Serial Simulation

Mock CA certificate serial simulated as revoked in National CRL/OCSP list.

SIGNATURE DIGEST MISMATCH -- TAMPERING DETECTED BY VERIFIER

Expected Result in GeM Triage Desk: Immediate Red Flag & Rejection Recommendation.

X

Backend Hash: d41d8cd98f00b204e9800998ecf8427e != Signed Certificate Attribute Digest

Status: Cryptographic integrity failed. Audit ledger entry logged with security incident flag.
